9. Jurisdictional Derogations and Transitional Arrangements

9.1 Purpose and Application

9.1.1 Purpose

(a) This Chapter contains the jurisdictional derogations that apply in relation to each participating jurisdiction.

(b) This Chapter prevails over all other Chapters of the Rules.

9.1.2 Jurisdictional Derogations

The jurisdictional derogations that apply in relation to each participating jurisdiction are set out in this Chapter as follows:

(a) Part A - Victoria;

(b) Part B - New South Wales;

(c) Part C - Australian Capital Territory;

(d) Part D - South Australia;

(e) Part E - Queensland; and

(f) Part F – Tasmania.

Part G sets out the Schedules to this Chapter 9.

Part A Jurisdictional Derogations for Victoria

9.3 Definitions

9.3.1 General Definitions

For the purposes of this Part A:

(1) a word or expression defined in the glossary in Chapter 10 has the meaning given to it in the glossary unless it is referred to in column 1 of the following table; and

(2) a word or expression referred to in column 1 of the following table has the meaning given to it in column 2 of the table:

<table>
<thead>
<tr>

9.3A Fault levels
Subject to the terms of a connection agreement under section 50E(1)(a) of the National Electricity Law, AEMO must, when planning the declared shared network, use its best endeavours to ensure that fault levels at a connection point will not, as a result of a short circuit at that connection point, exceed the limits set out in the following table:

**FAULT LEVEL TABLE**

9.4 Transitional Arrangements for Chapter 2 - Registered Participants, Registration and Cross Border Networks

9.4.1 [Deleted]

9.4.2 Smelter Trader

(a) For the purposes of the Rules:
(1) Smelter Trader is deemed to be entitled to register as a Customer in respect of the connection points used to supply electricity under a Smelter Agreement for so long as those connection points are used to supply electricity under that Smelter Agreement;

(2) Smelter Trader is deemed to be registered as a Customer and as a Market Customer in relation to electricity supplied under a Smelter Agreement;

(3) the electricity supplied under the Smelter Agreements is deemed to have been classified as a market load and the connection points used to supply that electricity are deemed to have been classified as Smelter Trader's market connection points;

(4) [Deleted]

(5) Alcoa of Australia Limited (ACN 004 879 298) is deemed to be entitled to register as a Generator and a Market Generator in relation to the generating systems forming part of the Anglesea Power Station; and

(6) [Deleted]

(7) no Counterparty is or is to be taken to be entitled to become a Market Participant, an Intending Participant or a Customer in respect of electricity supplied under that Smelter Agreement.

(8) [Deleted]

(9) [Deleted]

(b) This clause 9.4.2 ceases to have effect upon the termination of the last of the Smelter Agreements.

9.4.3 Smelter Trader: compliance

(a) If complying with a requirement of the Rules (the "Rules Requirement") would result in the Smelter Trader being in breach of a provision of one or more of the Smelter Agreements (the "Contractual Requirement"), then the Smelter Trader is not required to comply with the Rules Requirement to the extent of the inconsistency between the Rules Requirement and the Contractual Requirement.

(b) If the Smelter Trader does not comply with a Rules Requirement in the circumstances described in clause 9.4.3(a), then the Smelter Trader must:

(1) give written notice to the AER of:

   (i) the Rules Requirement which has not been complied with;

   (ii) details of each act or omission which partly or wholly constitutes non-compliance with that Rules Requirement; and

   (iii) details of each Contractual Requirement which is said by the Smelter Trader to be inconsistent with the Rules Requirement, as soon as practicable and in any event within 30 days after the non-compliance with the Rules Requirement occurs or commences; and
(2) provide the AER with any documents or information in the possession or control of the Smelter Trader which evidence the matters referred to in clause 9.4.3(b)(1) within 14 days (or any longer period agreed by the AER) of receiving a written request from the AER.

**Note**

This clause is classified as a civil penalty provision under the National Electricity (South Australia) Regulations. (See clause 6(1) and Schedule 1 of the National Electricity (South Australia) Regulations.)

(c) If:

(1) the Smelter Trader requires the co-operation of a Counterparty to a Smelter Agreement to comply with a requirement of the Rules;

(2) the Smelter Trader has used reasonable endeavours to obtain the Counterparty's co-operation in order to enable the Smelter Trader to comply with that requirement; and

(3) under the Smelter Agreements, SEC has no ability to require the Counterparty to so co-operate with SEC and the Counterparty is not in breach of the Smelter Agreements by refusing to so co-operate with SEC,

then the Smelter Trader is not required to comply with that requirement.

(d) If the Smelter Trader does not comply with a requirement of the Rules in the circumstances described in clause 9.4.3(c), then the Smelter Trader must:

(1) give written notice to the AER of:

   (i) the requirement of the Rules that has not been complied with;

   (ii) details of each act or omission which partly or wholly constitutes non-compliance with that requirement of the Rules; and

   (iii) details of the endeavours made by the Smelter Trader to obtain the co-operation of the Counterparty to enable the Smelter Trader to comply with the requirement of the Rules,

as soon as reasonably practical and in any event before the expiration of 30 days after the non-compliance with the requirement of the Rules occurs or commences; and

**Note**

This clause is classified as a civil penalty provision under the National Electricity (South Australia) Regulations. (See clause 6(1) and Schedule 1 of the National Electricity (South Australia) Regulations.)

(2) provide the AER with any documents or information in the possession or control of the Smelter Trader which evidence the matters referred to in clause 9.4.3(d)(1) within 14 days (or any longer period agreed by the AER) of receiving a written request from the AER.
(e) To avoid any doubt, if:

(1) after reviewing any written notice provided by the Smelter Trader under clause 9.4.3(b)(1) and any additional documents or information provided by the Smelter Trader under clause 9.4.3(b)(2), the AER forms the view that compliance with the relevant Rules Requirement would not have resulted in the Smelter Trader being in breach of the relevant Contractual Requirement; or

(2) after reviewing any written notice provided by the Smelter Trader under clause 9.4.3(d)(1) and any additional documents or information provided by the Smelter Trader under clause 9.4.3(d)(2), the AER forms the view that any of the requirements of clause 9.4.3(c) were not satisfied in respect of the subject of the notice,

then the matter may be dealt with by the AER as a breach of the Rules.

(f) The Smelter Trader must give any notice or other information required to be given under this clause 9.4.3 (called in this clause “required information”) in advance if it becomes aware of the potential for the circumstances giving rise to its obligation to give the required information to arise. If any required information is given under this clause 9.4.3(f), then:

(1) the required information is taken to have been given in accordance with this clause 9.4.3; and

(2) notwithstanding clause 9.4.3(f)(1), notice must be given of the non-compliance and further information provided to the AER upon request under clause 9.4.3(b) or clause 9.4.3(d) (as the case may be) after the non-compliance occurs or commences.

(g) If non-compliance with the Rules is continuing, the notice of non-compliance with the Rules provided under clause 9.4.3(b) or clause 9.4.3(d) (as the case may be) will be effective in relation to that non-compliance until that non-compliance ends if the relevant notice specifies that the non-compliance is continuing. The Smelter Trader must notify the AER of the end of the non-compliance no later than 30 days after the non-compliance ends.

Note
This clause is classified as a civil penalty provision under the National Electricity (South Australia) Regulations. (See clause 6(1) and Schedule 1 of the National Electricity (South Australia) Regulations.)
(h) Clauses 9.4.3(a) and 9.4.3(c) do not affect SEC's obligations with respect to registration with NEMMCO or making payments in respect of Participant fees, prudential requirements or settlement amounts.

9.4.4 Report from AER

Within 30 days of the end of each Quarter, the AER must prepare a report for the previous Quarter and make it available on request to all Registered Participants and to those participating jurisdictions that participated in the market during the Quarter covered by the report. The report must include:

(a) a summary of the acts or omission of the Smelter Trader constituting non-compliance with any requirement of the Rules, as disclosed in written notices received by the AER under clause 9.4.3 during the Quarter covered by the report; and

(b) an assessment by the AER of the effect that those acts or omissions have had on the efficient operation of the market during the Quarter covered by the report.

9.4.5 Cross Border Networks

(a) If:

(1) the Victorian Minister considers that a transmission network or distribution network situated in Victoria is a continuation of a network situated in another participating jurisdiction and should be considered to be part of the network of that other participating jurisdiction; and

(2) the Minister for that other participating jurisdiction consents,

then the Victorian Minister and the Minister for that other participating jurisdiction may nominate that the network is deemed to be entirely in that other participating jurisdiction and the Rules including any relevant jurisdictional derogations for the other participating jurisdiction are deemed to apply to the network as if the network were located entirely within that other participating jurisdiction.

(b) If a nomination is made under clause 9.4.5(a), then the jurisdictional derogations for Victoria do not apply to the extended part of the relevant network which is situated in Victoria.

(c) If the Minister of another participating jurisdiction nominates that the jurisdictional derogations for Victoria should apply to a network part of which is situated in that other participating jurisdiction, then if the Victorian Minister consents, the jurisdictional derogations for Victoria are also to apply to that part of the network situated in the other participating jurisdiction.
9.5  [Deleted]

9.6  Transitional Arrangements for Chapter 4 - System Security

9.6.1  Operating Procedures (clause 4.10.1)

(a) For the purposes of clause 4.10.1(b), the System Operating Procedures as defined in the System Code as at 13 December 1998 (with the necessary changes to be made by VENCorp) are the regional specific power system operating procedures that apply from that date in respect of the Victorian Transmission Network.

(b) This clause is not to be taken as limiting in any way the operation of any other provision of the Rules relating to the review, updating and amendment of the regional specific power system operating procedures.

9.6.2  Nomenclature Standards (clause 4.12)

For the purposes of clause 4.12, the Nomenclature Standards as defined in the System Code as at 13 December 1998 are taken to be the nomenclature standards agreed between a Network Service Provider in respect of the Victorian Transmission Network or a Victorian Distribution Network and AEMO until AEMO and the relevant Network Service Provider agree otherwise under clause 4.12(a) or AEMO determines otherwise under clause 4.12(a).

9.7  Transitional Arrangements for Chapter 5 - Network Connection

9.7.1  [Deleted]

9.7.2  [Deleted]

9.7.3  [Deleted]

9.7.4  Regulation of Distribution Network Connection

(a) In this clause:

appropriate regulator means:

(1) if there has been no transfer of regulatory responsibility to the AER under a law of Victoria – the ESC;

(2) if there has been a transfer of regulatory responsibility to the AER under a law of Victoria – the AER.

(b) This clause 9.7.4:

(1) applies in respect of the regulation of access to, connection to, the modification of a connection to, the augmentation of, the provision of network services or distribution use of system services, and the modification of the provision of network services or distribution use of system services, in respect of, a distribution network (including any part of a distribution network) situated in Victoria; and

(2) expires on the date fixed under the National Electricity (Victoria) Act 2005 as the Victorian distribution pricing determination end date.
Note:
The date is 31 December 2010 or a later date fixed in a Victorian distribution pricing determination as the date on which the determination will cease to have effect.

(c) Notwithstanding anything to the contrary in the Rules, the appropriate regulator is responsible for the regulation of access to, connection to, the modification of a connection to, the augmentation of, the provision of network services and distribution use of system services, and the modification of the provision of network services and distribution use of system services, in respect of, any distribution network to which this clause applies.

(d) For the purposes of clause 5.3.6(c), any question as to the fairness and reasonableness of an offer to connect in relation to a distribution network to which this clause applies is to be decided by the appropriate regulator on the basis of the appropriate regulator's opinion of the fairness and reasonableness of the offer.

(e) If a dispute arises in relation to any of access to, connection to, the modification of a connection to, the augmentation of, the provision of network services or distribution use of system services, or the modification of the provision of network services or distribution use of system services, in respect of, any distribution network to which this clause applies, then that dispute must be resolved in accordance with procedures specified by the appropriate regulator and clause 8.2 does not apply to that dispute.

9.7.7 [Deleted]

9.8 Transitional Arrangements for Chapter 6 - Network Pricing

9.8.1 [Deleted]

9.8.2 [Deleted]

9.8.3 [Deleted]

9.8.4 Transmission Network Pricing

(a) Notwithstanding Chapter 6A, in determining transmission service pricing and revenues in respect of the Victorian Transmission Network or a part of the Victorian Transmission Network, the AER must:

(1) [Deleted]

(2) [Deleted]

(3) ensure that each Distributor has the benefit or burden of an equalisation adjustment for each financial year equal to the amount of the adjustment specified for that Distributor in the column headed "Equalisation Adjustment" in the following table:
Table

<table>
<thead>
<tr>
<th>Business</th>

</tr>
<tr>
<td>thereafter</td>
<td>0</td>
</tr>
</tbody>
</table>

(b) AEMO must, in allocating revenue to be recovered from each Distributor to which it provides prescribed TUOS services and prescribed common transmission services by means of, or in connection with a declared shared network in each financial year of a relevant regulatory period, adjust the allocation in accordance with paragraph (a)(3).
9.8.7 Distribution network pricing – transitional application of former Chapter 6

(a) Subject to this clause, the former Chapter 6 continues to apply in relation to Victorian distribution networks during the transitional period.

(b) The appropriate regulator has the powers and functions of the Jurisdictional Regulator under the former Chapter 6 as if appointed for Victoria as the Jurisdictional Regulator for the purposes of clause 6.2.1(b) of the former Chapter 6.

(c) The following apply only to the extent they are consistent with clause 2.1 of the Tariff Order:

   (1) national guidelines for distribution service pricing (so far as applicable to Victorian distribution networks) formulated under clause 6.2.1(c) of the former Chapter 6;

   (2) guidelines and rules formulated for Victoria under clause 6.2.1(f) of the former Chapter 6,

(d) The arrangements outlined in Parts D and E of the former Chapter 6 must also be applied by the appropriate regulator subject to clause 2.1 of the Tariff Order.

(e) The value of sunk assets determined under clause 6.2.3(e)(5)(ii) of the former Chapter 6 must be consistent with clause 2.1 of the Tariff Order.

(f) In regulating distribution service pricing for a Victorian distribution network:

   (1) the appropriate regulator must specify explicit price capping as the form of economic regulation to be applied in accordance with clause 6.2.5(b) of the former Chapter 6; and

   (2) the appropriate regulator must comply with clause 2.1 of the Tariff Order.
(g) Neither this clause, nor the provisions of former Chapter 6 as continued in
force by this clause, are relevant to a distribution determination that is to have
effect after the end of the transitional period.

(h) In this clause:

appropriate regulator means:

(1) if there has been no transfer of regulatory responsibility to the AER
under a law of Victoria – the ESC;

(2) if a transfer of regulatory responsibility has been made to the AER under
a law of Victoria – the AER.

transitional period means the period commencing on the commencement of
this clause and ending on its expiry.

Victorian distribution network means a distribution network situated wholly
or partly in Victoria.

(i) This clause expires on the date fixed under the National Electricity (Victoria)
Act 2005 as the Victorian distribution pricing determination end date.

Note:
The date is 31 December 2010 or a later date fixed in a Victorian distribution pricing
determination as the date on which the determination will cease to have effect.

9.8.8 Exclusion of AER's power to aggregate distribution systems and
parts of distribution systems

The following provisions of Chapter 6 apply to distribution systems situated in
Victoria as if, in each case, the words “unless the AER otherwise determines” were
omitted:

(a) clause 6.2.4(c);

(b) clause 6.2.4(d);

(c) clause 6.8.2(e);

(d) clause 6.8.2(f).

Note:
The effect of these modifications is to exclude the AER’s power to consolidate, under the ambit of
a single distribution determination, 2 or more distribution systems, or 2 or more parts of a single
distribution system that had, before the commencement of Chapter 6, been separately regulated.

9.9 Transitional Arrangements for Chapter 7 - Metering

9.9.1 Metering Installations To Which This Schedule Applies

The transitional arrangements set out in this clause 9.9 apply in relation to a metering
installation (including a check metering installation) in use at market commencement that was required to comply with, and did comply with, the Wholesale Metering Code at market commencement.
9.9.2 [Deleted]
9.9.3 [Deleted]
9.9.4 [Deleted]
9.9.5 [Deleted]
9.9.6 [Deleted]
9.9.7 [Deleted]
9.9.8 [Deleted]
9.9.9 Periodic Energy Metering (clause 7.9.3)

(a) Subject to clause 9.9.9(b), for the purposes of clause 7.10.5(a), AEMO, the Local Network Service Provider and the Market Participant are taken to have agreed that the data referred to in clause 7.10.5(a) which is obtained from a metering installation to which this clause 9.9 applies may be collated in 15 minute intervals.

(b) This clause 9.9.9 ceases to apply in respect of a metering installation if AEMO, the relevant Local Network Service Provider or the relevant Market Participant gives notice requiring an agreement to be reached under clause 7.10.5(a).

9.9.10 Use of Alternate Technologies (clause 7.13)

(a) Subject to this clause 9.9.10, if at market commencement the Wholesale Metering Code provides for the use of alternate technologies or processes for the purpose of calculating the consumption of energy by a non-franchise customer (as defined in the EI (RP) Act and in force immediately before the commencement of section 39(a) of the Electricity Industry Act 1995 (Vic)), then the use of these technologies or processes is taken to have been agreed between the relevant Market Participant(s), the Local Network Service Provider and AEMO but only to the extent to which the alternate technology or process was in use at market commencement in relation to that non-franchise customer.
Schedule 9A3  Jurisdictional Derogations Granted to Generators

1. **Interpretation of tables**
   In this schedule 9A3:
   
   (a) a reference to a *Generator* listed in a table is a reference to a *Generator* listed in column 1 of the relevant table;
   
   (b) a reference to a *generating unit* listed in a table in relation to a *Generator* is a reference to each *generating unit* listed opposite the *Generator* in the relevant table;
   
   (c) a reference to a *Network Service Provider* in relation to a *generating unit* or a *Generator* listed in a table is to be taken to be:
      
      (1) in the case of a *generating unit connected to a transmission network*, a reference to VENCorp; and
      
      (2) in the case of a *generating unit connected to a distribution network*, a reference to the person that is the *Network Service Provider* in relation to that *distribution network*; and
   
   (d) a reference to a modification or variation of the *Rules* or an item taken to have been agreed for the purposes of the *Rules* listed in a table applies in respect of each *generating unit* listed opposite that modification, variation or agreed item in the table.

2. **Continuing effect**
   In this schedule 9A3, a reference to:
   
   (a) a particular *Generator* in relation to a *generating unit*; or
   
   (b) a particular *Network Service Provider* in relation to a *Generator*,

Schedule 9A1.1 [Deleted]

Schedule 9A1.2 [Deleted]

Schedule 9A1.3 [Deleted]

Schedule 9A2 [Deleted]
at any time after the 13 December 1998 is to be taken as a reference to the person or persons who is or are (or who is or are deemed to be) from time to time registered with AEMO as the Generator in respect of that generating unit for the purposes of the Rules or the Network Service Provider from time to time in respect of the transmission network or distribution network to which the generating unit is connected.

3. **Subsequent agreement**

Where, under a provision of this schedule 9A3, a particular matter is taken to have been agreed for the purposes of schedule 5.2 of the Rules in relation to a generating unit, then that provision ceases to apply in respect of that generating unit if all the parties required to reach agreement in relation to that matter under the Rules so agree expressly in writing.

4. **[Deleted]**

5. **Reactive Power Capability (clause S5.2.5.1 of schedule 5.2)**

Clause S5.2.5.1 of schedule 5.2 of the Rules is replaced for a Generator listed in Table 2 in respect of those generating units listed in column 2 of Table 2 by the following:

For the purpose of this clause S5.2.5.1:

- **rated active power** output means the 'Rated MW (Generated)' (as defined in the Generating System Design Data Sheet) for the relevant synchronous generating unit; and

- **nominal terminal voltage** means the 'Nominal Terminal Voltage' (as defined in the Generating System Design Data Sheet) for the relevant synchronous generating unit.

(a) Each of the synchronous generating units, while operating at any level of active power output, must be capable of:

1. supplying at its terminals an amount of reactive power of at least the amount that would be supplied if the generating unit operated at rated active power output, nominal terminal voltage and a lagging power factor of 0.9; and

2. absorbing at its terminals an amount of reactive power of at least the amount that would be absorbed if the generating unit operated at rated active power output, nominal terminal voltage and a leading power factor set out in respect of that generating unit in column 3 of Table 2.

(b) In the event that any of the relevant power factors referred to in paragraph (a) above cannot be provided in respect of a generating unit, the relevant Generator must reach a commercial arrangement under its connection agreement with the relevant Network Service Provider, or with another Registered Participant, for the supply of the deficit in reactive power as measured at that generating unit's terminals.

9.12 Transitional Arrangements for Chapter 2 - Generators, Registered Participants, Registration and Cross Border Networks

9.12.1 [Deleted]

9.12.2 Customers

For the purposes of clause 2.3.1(e), and for the purposes of clause 2.4.2(b) in so far as it relates to Customers, a person satisfies the requirements of New South Wales for classification of a connection point of that person if that person is a retailer or is a wholesale customer (as defined in the ES Act).

9.12.3 Power Traders

(a) Each Power Trader for the purpose of supplying electricity under a Power Supply Agreement (the "Power Supply Agreement") is deemed to be and at all relevant times to have been registered with AEMO as a Market Customer in relation to electricity supplied under the Power Supply Agreement, which electricity is deemed to be and at all relevant times to have been a market load.

(b) If complying with a requirement of the Rules ("the Rules Requirement") would result in a Power Trader being in breach of a provision of a Power Supply Agreement to which it is a party ("the Contractual Requirement"), the Power Trader is not required to comply with the Rules Requirement to the extent of the inconsistency between the Rules Requirement and the Contractual Requirement.

(c) If a Power Trader does not comply with a Rules Requirement in the circumstances described in clause 9.12.3(b), then the Power Trader must:

(1) give written notice to the AER of:

   (i) the Rules Requirement which has not been complied with;

   (ii) details of each act or omission which partly or wholly constitutes non-compliance with that Rules Requirement; and

   (iii) details of each Contractual Requirement which is said by the Power Trader to be inconsistent with the Rules Requirement,
by no later than 7 days after the non-compliance with the Rules Requirement occurs or commences; and

**Note**

This clause is classified as a civil penalty provision under the National Electricity (South Australia) Regulations. (See clause 6(1) and Schedule 1 of the National Electricity (South Australia) Regulations.)

(2) provide the AER with any documents or information in the possession or control of the Power Trader which evidence the matters referred to in clause 9.12.3(c)(i), within 14 days (or any further period agreed to by the AER) of receiving a written request from the AER.

**Note**

This clause is classified as a civil penalty provision under the National Electricity (South Australia) Regulations. (See clause 6(1) and Schedule 1 of the National Electricity (South Australia) Regulations.)

(d) If:

(1) a Power Trader requires the co-operation of any other party to a Power Supply Agreement (a **counterparty**) to comply with a requirement of the **Rules** (the **Rules Requirement**);

(2) the Power Trader has used all reasonable endeavours to obtain the counterparty's co-operation in order to enable the Power Trader to comply with the Rules Requirement; and

(3) under the Power Supply Agreement the Power Trader has no ability to require the counterparty to so co-operate with the Power Trader and the counterparty is not in breach of the Power Supply Agreement by refusing to so co-operate with the Power Trader,

then the Power Trader is not required to comply with that Rules Requirement.

(e) If a Power Trader does not comply with a Rules Requirement in the circumstances described in clause 9.12.3(d), then the Power Trader must:

(1) give written notice to the **AER** of:

(i) the Rules Requirement which has not been complied with;

(ii) details of each act or omission which partly or wholly constitutes non-compliance with that Rules Requirement; and

(iii) details of the endeavours made by the Power Trader to obtain the counterparty's co-operation to enable the Power Trader to comply with the Rules Requirement,

by no later than 7 days after the non-compliance with the Rules Requirement occurs or commences; and

**Note**

This clause is classified as a civil penalty provision under the National Electricity (South Australia) Regulations. (See clause 6(1) and Schedule 1 of the National Electricity (South Australia) Regulations.)
(2) provide the AER with any documents or information in the possession or control of the Power Trader which evidence the matters referred to in clause 9.12.3(e)(1), within 14 days (or any further period agreed to by the AER) of receiving a written request from the AER.

Note
This clause is classified as a civil penalty provision under the National Electricity (South Australia) Regulations. (See clause 6(1) and Schedule 1 of the National Electricity (South Australia) Regulations.)

(f) To avoid any doubt, if:

(1) after reviewing any written notice provided by a Power Trader under clause 9.12.3(c)(1) and any additional documents or information provided by the Power Trader under clause 9.12.3(c)(2), the AER forms the view that compliance with the relevant Rules Requirement would not have resulted in the Power Trader being in breach of the relevant Contractual Requirement; or

(2) after reviewing any written notice provided by a Power Trader under clause 9.12.3(e)(1) (the Notice) and any additional documents or information provided by the Power Trader under clause 9.12.3(e)(2), the AER forms the view that any of the requirements of clause 9.12.3(d) were not in fact satisfied in respect of the subject matter of the Notice, then the matter may be dealt with by the AER as a breach of the Rules.

(g) A Power Trader may provide notice and information to the AER as required in clauses 9.12.3(c) or (e), as the case requires, in advance if it becomes aware of the potential for the circumstances described in clauses 9.12.3(b) or (d) to arise. Such notice and information will be deemed to have been given in accordance with clauses 9.12.3(c) or (e), as the case requires.

(h) Notwithstanding the provision of notice and information in advance in accordance with clause 9.12.3(g), the Power Trader must give notice of non-compliance with the Rules and provide such other documents or information as required in accordance with clauses 9.12.3(c) or (e), as the case requires, after such non-compliance has occurred or commenced.

Note
This clause is classified as a civil penalty provision under the National Electricity (South Australia) Regulations. (See clause 6(1) and Schedule 1 of the National Electricity (South Australia) Regulations.)

(i) If non-compliance with the Rules is continuing, the notice of non-compliance with the Rules provided under clauses 9.12.3(c) or (e), as the case requires, will be effective in relation to that non-compliance until that non-compliance ends provided that:

(1) the notice specifies that the non-compliance is continuing; and

(2) the Power Trader notifies the AER of the end of the non-compliance no later than 7 days after the non-compliance ends.
(j) Clauses 9.12.3(b) and (d) do not affect a Power Trader's obligation with respect to registration with AEMO or making payments in respect of:

1. Participant fees;
2. prudential requirements; or
3. settlement amounts.

(k) Within 30 days of the end of each quarter in each calendar year, the AER must prepare a quarterly report for the previous quarter and make it available on request to all Registered Participants and to the participating jurisdictions which participated in the market during the quarter covered by the report. The quarterly report must include:

1. a summary of the acts or omissions of Power Traders constituting non-compliance with any Rules Requirement, as disclosed in written notices received by the AER under clauses 9.12.3(c) or (e) during the quarter covered by the report; and
2. an assessment by the AER of the effect that those acts or omissions have had on the efficient operation of the market during the quarter covered by the report.

(l) This clause 9.12.3 ceases to have effect in respect of a Power Supply Agreement upon termination of that agreement.

9.12.4 Cross Border Networks

(a) If:

1. the Minister considers that a transmission network or distribution network situated in New South Wales is a continuation of a network situated in another participating jurisdiction and should be considered to be part of the network of that other participating jurisdiction; and
2. the Minister for that other participating jurisdiction consents,

then those Ministers may nominate that the network is deemed to be entirely in that other participating jurisdiction and the Rules including any relevant jurisdictional derogations for the other participating jurisdiction are deemed to apply to the network as if the network were located entirely within that other participating jurisdiction.

(b) If a nomination is made under clause 9.12.4(a), then the jurisdictional derogations for New South Wales do not apply to the extended part of the relevant network which is situated in New South Wales.

(c) If the Minister of another participating jurisdiction nominates that the jurisdictional derogations for New South Wales should apply to a network part of which is situated in that other participating jurisdiction, then if the Minister in respect of New South Wales consents, the jurisdictional derogations for New South Wales are also to apply to that part of the network situated in the other participating jurisdiction.
9.13 [Deleted]

9.14 Transitional Arrangements for Chapter 4 - System Security

For the purposes of clause 4.10.1, the regional specific power system operating procedures that apply in respect of operations on the network situated in New South Wales are, with the inclusion of any operating procedures set out in such operating manuals and other documents as are specified by TransGrid and provided to NEMMCO, the regional specific power system operating procedures reviewed and updated under clause 4.10.2(e).

9.15 NSW contestable services for Chapter 5A

9.15.1 Definitions

In this rule 9.15—

(a) connection service has the same meaning as in Chapter 5A.

(b) NSW contestable service means a connection service that is contestable under the jurisdictional electricity legislation of NSW, because that legislation permits the service to be provided by more than one supplier as a contestable service or on a competitive basis.

9.15.2 Chapter 5A not to apply to certain contestable services

Chapter 5A of the Rules does not apply to a NSW contestable service.

9.16 Transitional Arrangements for Chapter 6 - Network Pricing

9.16.1 NSW contestable services

(a) In this clause 9.16.1—

(1) connection service has the same meaning as in Chapter 5A.

(2) NSW contestable service means a connection service that is contestable under the jurisdictional electricity legislation of NSW, because that legislation permits the service to be provided by more than one supplier as a contestable service or on a competitive basis.

(b) Part DA of Chapter 6 does not apply to a NSW contestable service.

9.16.2 [Deleted]

9.16.3 Jurisdictional Regulator

(a) [Deleted]

(b) However, the definitions of local area and Local Network Service Provider are to be read as if the reference to the authority responsible for administering the jurisdictional electricity legislation in the relevant participating jurisdiction were replaced by a reference to the laws of the State of New South Wales.

(c) [Deleted]
9.16.4 Deemed Regulated Interconnector
For the purposes of the Rules, the interconnector between Armidale in New South Wales and Tarong in Queensland, to the extent that it forms part of the power system in New South Wales, is deemed to be a regulated interconnector.

9.16.5 [Deleted]

9.17 Transitional Arrangements for Chapter 7 - Metering

9.17.1 Extent of Derogations
(a) [Deleted]
(b) [Deleted]
(c) The transitional arrangements set out in clauses 9.17.2 and 9.17.4 apply to all metering installations (including check metering installations) that were in use at 13 December 1998 and that were required to comply with (and did comply with) the NSW Electricity Market Code as at 13 December 1998.

9.17.2 Initial Registration (clause 7.1.2)
(a) Subject to clause 9.17.2(b), if:
   (1) a metering installation to which this clause 9.17 applies was registered with TransGrid under the NSW Electricity Market Code as at 13 December 1998; and
   (2) the details registered with TransGrid were provided to NEMMCO on or before 13 December 1998,
then the metering installation is taken to be registered with AEMO for the purposes of clause 7.1.2(a).
(b) The responsible person in respect of a metering installation which is taken to be registered under clause 9.17.2(a) must ensure that the requirements for registration of a metering installation under Chapter 7 are met by 13 December 1999 or such other time as may be agreed with AEMO.

9.17.3 Amendments to Schedule 9G1
The transitional metering provisions set out in schedule 9G1, amended as follows, apply to New South Wales in respect of Chapter 7:
(a) [Deleted]
(b) [Deleted]
(c) If, in respect of a metering installation commissioned before 13 December 1998, the responsible person has obtained an exemption prior to 13 December 1998 from TransGrid pursuant to clause 2.2(c) of Schedule 7.2 of the NSW Electricity Market Code, then that exemption is deemed to continue as an exemption granted by AEMO pursuant to clause S7.2.2(c) of schedule 7.2 of the Rules.
(d) [Deleted]
9.17.4 Compliance with AS/NZ ISO 9002 (clause S7.4.3(f) of schedule 7.4)

Category 1A, 2A and 3A Metering Providers must be able to exhibit the requirements of clause S7.4.3(f)(1) of schedule 7.4 of the Rules by the date which is 2 years after the date the Metering Provider applied to be registered as a Metering Provider with NEMMCO.

9.20.2 Cross Border Networks

(a) If:

(1) the Minister considers that a transmission network or distribution network situated in the Australian Capital Territory is a continuation of a network situated in New South Wales and should be considered to be a part of the New South Wales network; and

(2) the Minister for New South Wales consents,

then those Ministers may nominate that the network is deemed to be entirely in New South Wales and the Rules including any relevant jurisdictional
derogations for New South Wales are deemed to apply to the network as if the network were located entirely within New South Wales.

(b) If a nomination is made under clause 9.20.2(a), then the jurisdictional derogations for the Australian Capital Territory do not apply to the extended part of the relevant network which is situated in the Australian Capital Territory.

(c) If the Minister for New South Wales nominates that the jurisdictional derogations for the Australian Capital Territory should apply to a network part of which is situated in New South Wales, then if the Minister for the Australian Capital Territory consents, the jurisdictional derogations for the Australian Capital Territory are also to apply to that part of the network situated in New South Wales.

9.26 Transitional Arrangements for Chapter 2 - Registered Participants, Registration And Cross Border Networks

9.26.1 Registration as a Generator

For the purposes of the Rules:

(a) ETSA Power and any one person that replaces or assumes rights or obligations of ETSA Power as party to the Osborne agreement, by way of succession, assignment, novation, ministerial direction, or otherwise, is deemed to be, and at all relevant times to have been, the person who must register as the Generator in relation to the generating system and associated generating units which are the subject of the Osborne agreement;

(b) Osborne Cogeneration Pty Ltd is not to, and is not to be taken to be entitled to, and is to be taken to have been exempted from the requirement to, register as a Generator in relation to the generating system and associated generating units which are the subject of the Osborne agreement;

(c) SA Generation Corporation and any person that replaces or assumes rights or obligations of SA Generation Corporation as party to the Northern Power Station agreements, by way of succession, assignment, novation, ministerial direction, or otherwise, is deemed to be, and at all relevant times to have been, the person that must register as the Generator (unless otherwise exempt) in relation to the generating system and associated generating units which are the subject of the Northern Power Station agreements;

(d) the Northern Power Station Participants are not to, and are not to be taken to be entitled to, and are taken to have been exempted from the requirement to, register as a Generator in relation to the generating system and associated generating units which are the subject of the Northern Power Station agreements;

(e) clauses 9.26.1(a) and (b) will cease to have effect on the termination of the Osborne agreement;

(f) clauses 9.26.1(c) and (d) will cease to have effect on the termination of the last of the Northern Power Station agreements;

(g) Generation Lessor Corporation is not obliged to, and is not to be taken to be entitled to, and is to be taken to have been exempted from the requirement to, register as a Generator in relation to the generating system and associated generating units in South Australia which are the subject of the South Australian Generation Leases; and

(h) clause 9.26.1(g) will apply in respect of each South Australian Generation Lease from the time that lease becomes effective and will cease to have effect
on the termination of that lease (or the termination of any renewal of that lease).

9.26.2 **Registration as a Customer**

For the purposes of clause 2.3.1(e), a person may classify its electricity purchased at a *connection point* in South Australia if the person is a *retailer* or a customer pursuant to the Electricity Act and regulations.

9.26.3 **Cross Border Networks**

(a) If:

(1) the *Minister* considers that a *transmission network* or *distribution network* situated in South Australia is a continuation of a *network* situated in another *participating jurisdiction* and should be considered to be part of the *network* of that other *participating jurisdiction*; and

(2) the *Minister* for that other *participating jurisdiction* consents,

then those *Ministers* may nominate that the *network* is deemed to be entirely in that other *participating jurisdiction* and the *Rules* including any relevant *jurisdictional derogations* for the other *participating jurisdiction* are deemed to apply to the *network* as if the *network* were located entirely within that other *participating jurisdiction*.

(b) If a nomination is made under clause 9.26.3(a), then the *jurisdictional derogations* for South Australia do not apply to the extended part of the relevant *network* which is situated in South Australia.

(c) If the *Minister* of another *participating jurisdiction* nominates that the *jurisdictional derogations* for South Australia should apply to a *network* part of which is situated in that other *participating jurisdiction*, then if the *Minister* in respect of South Australia consents, the *jurisdictional derogations* for South Australia are also to apply to that part of the *network* situated in the other *participating jurisdiction*.

9.26.4 **[Deleted]**

9.26.5 **Registration as a Network Service Provider**

For the purpose of the *Rules*:

(a) the South Australian Transmission Lease Participants are not obliged to, and are taken to have been exempted from the requirement to, register as a *Network Service Provider* in relation to the *transmission network* in South Australia which is the subject of the South Australian Transmission Lease.

(b) Clause 9.26.5(a) will cease to have effect on the termination, extension or variation of the South Australian Transmission Lease.

(c) Distribution Lessor Corporation is not obliged to, and is not to be taken to be entitled to, and is to be taken to have been exempted from the requirement to, register as a *Network Service Provider* in relation to the *distribution network* in South Australia which is the subject of the South Australian Distribution Network Lease.
(d) ETSA Transmission Corporation (notwithstanding that it is the owner and sub sub sub lessee of the transmission network in South Australia) is not obliged to, and is not to be taken to be entitled to, and is to be taken to have been exempted from the requirement to, register as a Network Service Provider in relation to the transmission network in South Australia which is the subject of the South Australian Transmission Network Sub Sub Sub Lease.

(e) Clause 9.26.5(c) will have effect for the period of each South Australian Distribution Network Lease (including the period of any renewal).

(f) Clause 9.26.5(d) will have effect for the period of each South Australian Transmission Network Sub Sub Sub Lease (including the period of any renewal).

9.27 [Deleted]

9.28 Transitional Arrangements for Chapter 5 - Network Connection

9.28.1 Application of clause 5.2

For the purposes of clause 5.2:

(a) for facilities existing at market commencement, Registered Participant exemptions may be sought from AEMO in accordance with the Rules for particular facilities where material departures from the Rules are reasonably expected. Any necessity to alter the existing arrangements for facilities is to be negotiated and agreed by affected Registered Participants;

(b) South Australia reserves the right to seek further exemptions from AEMO in accordance with the Rules for existing power stations if they are unable to meet the requirements of the Rules and those exemptions will not result in system damage; and

(c) [Deleted]

(d) [Deleted]

(e) the provisions in this clause 9.28 apply until there are corresponding changes to the Rules which deliver equivalent outcomes to the satisfaction of the South Australian Government.
9.29 Transitional Arrangements for Chapter 6 - Economic Regulation of Distribution Services

9.29.1 [Deleted]

9.29.2 [Deleted]

9.29.3 [Deleted]

9.29.4 [Deleted]

9.29.5 Distribution Network Pricing – South Australia

(a) In this clause:

**SA Distributor** means the *Distribution Network Service Provider* whose *distribution network* is situated in South Australia.

**relevant distribution determination** means the distribution determination for the SA Distributor for the *regulatory control period* that commences in 2010.

**small customer** has the same meaning as in the *Electricity Act 1996* (SA).

**statement of regulatory intent** means the *statement of regulatory intent* in regard to the electricity distribution efficiency carryover mechanism issued by the Essential Services Commission on 23 March 2007 under clause 7.4 of the Electricity Pricing Order made by the Treasurer under section 35B of the *Electricity Act 1996* (SA) on 11 October 1999.

(b) The relevant distribution determination:

(1) must incorporate appropriate transitional arrangements to take into account the change from a pre-tax to a *post-tax revenue model* (which must be consistent with any agreement between the *AER* and the SA Distributor about the arrangements necessary to deal with the transition); and

(2) must allow the SA Distributor to carry forward impacts associated with the calculation of Maximum Average Distribution Revenue under the price determination into the 2010/11 and 2011/12 *regulatory years*.

(c) The *efficiency benefit sharing scheme* under the relevant distribution determination must be consistent with the *statement of regulatory intent*.

(d) The following side constraint is to be applied to tariffs for small customers for the *regulatory control period* to which the relevant distribution determination applies:
The fixed supply charge component of the tariff must not increase by more than $10 from one regulatory year to the next.

(e) In preparing its framework and approach paper for the distribution determination that is to follow the relevant distribution determination, the\textit{AER} must consider whether the above side constraint should continue with or without modification.

(f) Any reduction in transmission network charges as a result of a regulatory reset (excluding reductions resulting from the distribution of settlements residue and settlements residue auction proceeds) must be paid to all customers.

\textbf{9.29.6 Capital contributions, prepayments and financial guarantees}

(a) The amount that a South Australian\textit{Distribution Network Service Provider} may receive by way of capital contribution, prepayment and/or financial guarantee in respect of a South Australian network will be determined by the appropriate regulator in accordance with\textit{applicable regulatory instruments}.

(b) This clause operates to the exclusion of clause 6.7.2(b) of the former Chapter 6 (as it continues in force under transitional provisions) and clause 6.21.2(2) of the present Chapter 6.

(c) In this clause:

\textit{appropriate regulator} means:

(1) if the South Australian Minister has made no transfer of regulatory responsibility to the\textit{AER} under clause 11.14.4 – the South Australian Essential Services Commission;

(2) if the South Australian Minister has made a transfer of regulatory responsibility to the\textit{AER} under clause 11.14.4 – the\textit{AER}.

\textbf{9.29.7 Ring fencing}

On the\textit{AER}'s assumption of responsibility for the economic regulation of\textit{distribution services} in South Australia, the guidelines entitled\textit{Operational Ring-fencing Requirements for the SA Electricity Supply Industry: Electricity Industry Guideline No. 9} dated June 2003 (including amendments and substitutions made up to the date the\textit{AER} assumes that responsibility) will be taken to be distribution ring-fencing guidelines issued by the\textit{AER} under Rule 6.17.

\textbf{9.29A Monitoring and reporting}

(a) This clause applies to information about\textit{interconnectors} into South Australia or consisting of South Australian market data that is:

(1) within \textit{AEMO}'s control; and

(2) reasonably required by a relevant South Australian authority to fulfil obligations under:

(i) a relevant protocol on the use of emergency powers; or

(ii) regulations under the\textit{Electricity Act 1996}(SA).
(b) *AEMO* must, at the request of a relevant South Australian authority, provide the authority with information to which this clause applies.

(c) The information must be provided by way of a real time data link or, if such a link is not available, by the most expeditious means reasonably practicable in the circumstances.

(d) If the cost incurred by *AEMO* in providing information under this clause exceeds the cost usually incurred in providing a Market Participant with information in accordance with the *Rules*, the relevant South Australian authority that requested the information must pay the excess.

(e) In this Rule:

**relevant protocol on the use of emergency powers** means the National Electricity Market Memorandum of Understanding on the Use of Emergency Powers (as amended from time to time) and includes any later protocol on the use of emergency powers agreed between jurisdictions participating in the National Electricity Market.

**relevant South Australian authority** means:

(a) the Technical Regulator; or

(b) an officer of the South Australian Public Service nominated by the SA Minister to be a responsible officer for the purpose of fulfilling obligations under:

(i) a relevant protocol on the use of emergency powers; or

(ii) regulations under the *Electricity Act 1996* (SA).

**Technical Regulator** means the person holding or acting in the office of Technical Regulator under section 7 of the *Electricity Act 1996* (SA).

#### 9.30.1 Chapter 7 - Metering

(1) The transitional metering provisions set out in schedule 9G1 apply to South Australia in respect of Chapter 7.

### Part E Jurisdictional Derogations for Queensland

</table>

9.32.2 Interpretation

In this Part E, a reference to any authority, corporation or body whether statutory or otherwise, in the event of that authority, corporation or body ceasing to exist or being reconstituted, renamed or replaced or its powers, duties or functions being transferred to or assumed by any other authority, corporation or body, will, as the case requires, be taken to refer to the authority, corporation or body replacing it or the authority, corporation or body, succeeding to or assuming the powers, duties or functions of it.
9.33 Transitional Arrangements for Chapter 1

9.33.1 [Deleted]

9.34 Transitional Arrangements for Chapter 2 - Registered Participants and Registration

9.34.1 Application of the Rules in Queensland (clauses 2.2 and 2.5)

Any person who engages in the activity of owning, controlling or operating:

(a) a generating system that supplies electricity to a transmission or distribution system of a kind referred to in clause 9.34.1(b); or

(b) a transmission or distribution system in Queensland which does not form part of the national grid,

is not to, and is not to be taken to be entitled to, and is taken to have been exempted from the requirement to, register as a Registered Participant in relation to that activity.

9.34.2 Stanwell Cross Border Leases (clause 2.2)

(a) Stanwell Corporation Ltd is deemed to be the person that must register as a Generator in relation to the generating systems which are the subject of the Stanwell Cross Border Leases.

(b) The parties (other than Stanwell Corporation Ltd) to the Stanwell Cross Border Leases are not to be and are not to be entitled to, and are taken to have been exempted from the requirement to, register as a Generator in relation to the generating systems which are the subject of the Stanwell Cross Border Leases.

(c) Clauses 9.34.2(a) and (b) cease to have effect upon the expiry or earlier termination of the last of the Stanwell Cross Border Leases.

9.34.3 [Deleted]

9.34.4 Registration as a Customer (clause 2.3.1)

(a) Subject to clause 9.34.4(c), for the purpose of clause 2.3.1(e), a person satisfies the requirements of Queensland for classification of a connection point if that person is:

(1) a customer (other than an excluded customer) in relation to that connection point; or

(2) a retailer who is authorised to sell electricity to the person connected at that connection point; or

(3) an exempt seller; or

(4) a person exempted under the National Energy Retail Law (Queensland), from the operation of section 88 of that Act.

(b) For the purpose of clause 2.3.1(e), a person does not satisfy the requirements of Queensland for classification of its electricity purchased at a connection point if that person is:

[Further text continues]
point in Queensland if the electricity is supplied through a transmission system which does not form part of the national grid.

9.34.5 There is no clause 9.34.5

9.34.6 Exempted generation agreements (clause 2.2)

(a) For the purpose of supplying electricity under any exempted generation agreement, for each generating system which forms part of one of the power stations listed in schedule 9E1 the Minister may determine, in consultation in each case with the owner of the relevant generating system, whether a State Electricity Entity (the "Nominated Generator"), rather than another person engaging in the activity of owning, operating or controlling the generating system, should be the Generator in respect of the generating system.

(b) For the purposes of the Rules if the Minister has determined a Nominated Generator for any generating system as described in clause 9.34.6(a):

(1) the Nominated Generator is taken to be, and at all relevant times to have been, and is the person that must register as, a Generator in relation to that generating system; and

(2) any person engaging in the activity of owning, controlling or operating that generating system, not being the Nominated Generator, is not to, is not entitled to, and is taken to have been exempted from the requirement to, register as a Generator in relation to that generating system.

(c) If complying with a requirement of the Rules ("the Rules Requirement") would result in a Nominated Generator being in breach of a provision of an exempted generation agreement to which it is a party (the contractual requirement), the Nominated Generator is not required to comply with the Rules requirement to the extent of the inconsistency between the Rules requirement and the contractual requirement provided that this clause 9.34.6(c) must not be interpreted to relieve a Nominated Generator of the obligation to submit offers in respect of a scheduled generating unit or to operate the generating unit in accordance with dispatch instructions determined under Chapter 3.

(d) If:

(1) a Nominated Generator requires the co-operation of one or more of the parties to an exempted generation agreement (a "counterparty") in order to enable the Nominated Generator to comply with the Rules requirement;

(2) the Nominated Generator has used its reasonable endeavours to obtain the counterparty's co-operation in order to enable the Nominated Generator to comply with the Rules requirement; and

(3) the Nominated Generator has no ability to require the counterparty to so co-operate with the Nominated Generator and the counterparty is not in breach of the exempted generation agreement by refusing to so co-operate,
then the Nominated Generator is not required to comply with the Rules requirement.

(e) If a Nominated Generator does not comply with a Rules requirement in the circumstances set out in clause 9.34.6(c) or (d), the Nominated Generator must:

(1) give notice to the AER as soon as practicable, and in any event before the expiration of 7 days after the non-compliance with the Rules requirement occurs or commences, of:

(a) details of the Rules requirement which has not been or will not be complied with;

(b) details of each act or omission which partly or wholly constitutes non-compliance with that Rules requirement;

(c) in the case of circumstances described in clause 9.34.6(c), unless explicitly prohibited by the terms of the relevant exempted generation agreement, details of each contractual requirement which is considered by the Nominated Generator to be inconsistent with the Rules requirement; and

(d) in the case of circumstances described in clause 9.34.6(d), details of the endeavours made by the Nominated Generator to obtain the counterparty's co-operation to enable the Nominated Generator to comply with the Rules requirement; and

(2) unless explicitly prohibited by the terms of the relevant exempted generation agreement, give the AER any documents or information in the possession or control of the Nominated Generator which evidence the matters referred to in clause 9.34.6(e)(1) within 14 days (or any further period agreed to by the AER) of receiving a written request from the AER.

(f) To avoid any doubt, if after reviewing a notice and any documents or information given by the Nominated Generator under clause 9.34.6(e), the AER forms the view that:

(1) in the case of circumstances described in clause 9.34.6(c), compliance with the Rules requirement would not have resulted in the Nominated Generator being in breach of the relevant contractual requirement; or

(2) in the case of circumstances described in clause 9.34.6(d), any of the requirements of clause 9.34.6(d) were not in fact satisfied,

then the matter may be dealt with by the AER as a breach of the Rules.

(g) [Deleted]

(h) A Nominated Generator may give notice and information to the AER as required in clause 9.34.6(e) in advance if it becomes aware of the potential for the circumstances described in clause 9.34.6(c) or 9.34.6(d) to arise, and the giving of that notice and information will be taken to satisfy the
requirements of the Nominated Generator in clause 9.34.6(e)(1) in respect of those circumstances.

(i) Notwithstanding the provision of notice and information in advance in accordance with clause 9.34.6(h), the Nominated Generator must provide such other documents or information as may be required in accordance with clause 9.34.6(e) after such non-compliance has occurred or commenced.

(j) If non-compliance with the Rules is continuing, the notice of non-compliance with the Rules provided under clause 9.34.6(e) will be effective in relation to that non-compliance until that non-compliance ends provided that:

(1) the notice specifies that the non-compliance is continuing; and

(2) the Nominated Generator notifies the AER of the end of the non-compliance no later than 7 days after the non-compliance ends.

(k) Clauses 9.34.6(c) and 9.34.6(d) do not affect the obligations of a Nominated Generator with respect to registration with AEMO or to making payments under the provisions of the Rules in respect of:

(1) Participant fees;

(2) prudential requirements; or

(3) settlement amounts.

(l) Within 30 days of the end of each quarter in each calendar year, the AER must prepare a quarterly report for the previous quarter and make it available upon request to all Registered Participants and those participating jurisdictions that participated in the market during the quarter covered by the report. The quarterly report must include:

(1) a summary of the acts or omissions of the Nominated Generator constituting non-compliance with any requirement of the Rules, as disclosed in written notices received by the AER under this clause 9.34.6 during the quarter covered by the report: and

(2) an assessment by the AER of the effect that those acts or omissions have had on the efficient operation, during the quarter covered by the report, of the spot market.

(m) [Deleted]

(n) No amendment, other than an amendment to correct a typographical error, may be made to an exempted generation agreement unless the parties to the exempted generation agreement submit to the AER:

(1) the proposed amendment, a copy of the exempted generation agreement and such supporting information as the parties consider necessary (the EGA amendment material); and

(2) a request that the AER seek advice from the ACCC as to whether the ACCC considers that the proposed amendment would or may:

(i) [Deleted]
(ii) [Deleted]

(iii) contravene a provision of the Competition and Consumer Act 2010 (Cth) or the Competition Code of a participating jurisdiction; and

(3) if requested by the AER to do so, such further information as may be required by the AER in order for the ACCC to consider the matters referred to in clause 9.34.6(n)(2),

and the proposed amendment is not prohibited under clause 9.34.6(q).

(o) When the parties to an exempted generation agreement submit EGA amendment material to the AER in accordance with clause 9.34.6(n), they may include as part of the material submitted a written request that the AER and the ACCC treat the EGA amendment material as confidential. In such a case the AER:

(1) must comply with that request until such time as the parties to the exempted generation agreement notify the AER in writing that the AER is no longer under an obligation to do so; and

(2) must not provide any EGA amendment material to the ACCC unless the parties to the exempted generation agreement have notified the AER in writing that they have agreed acceptable confidentiality arrangements in relation to the EGA amendment material with the ACCC and that the AER should provide the EGA amendment material to the ACCC.

(p) [Deleted]

(q) If, within 10 business days of receiving the material referred to in clause 9.34.6(n) or such other period as is agreed between the AER and the parties to the exempted generation agreement, the AER responds that:

(1) the ACCC considers that the proposed amendment would or may have any or all of the effects referred to in clause 9.34.6(n)(2); or

(2) the ACCC considers that it is unable, because of:

(i) insufficient information before it; or

(ii) any confidentiality arrangements in relation to the EGA amendment material agreed between the ACCC and the parties to the exempted generation agreement,

then the proposed amendment must not be made.

(r) If the AER has not provided a response to a request made in accordance with clause 9.34.6(n)(2) within:

(1) 10 business days of receiving the material referred to in clause 9.34.6(n); or
such other period as is agreed between the AER and the parties to the exempted generation agreement,

the ACCC is deemed to have no objection to the proposed amendment.

If the AER notifies the parties to the exempted generation agreement that the ACCC has no objection to the proposed amendment, or if the ACCC is deemed under clause 9.34.6(r) to have no objection to the proposed amendment, the parties to the exempted generation agreement may make the proposed amendment.

This clause 9.34.6 ceases to have effect in respect of a generating system the subject of an exempted generation agreement upon the termination of that agreement.

9.35  [Deleted]

9.36  [Deleted]

9.37  Transitional Arrangements for Chapter 5 - Network Connection

9.37.1  [Deleted]

9.37.2  Existing connection and access agreements (clause 5.2)

(a) The technical connection and network pricing requirements of the Interconnection and Power Pooling Agreement dated 30 March 1994 between the owners of the Gladstone Power Station and the Queensland Electricity Commission (as amended prior to 18 January 1998) are to be taken to be a connection agreement in respect of both the Gladstone Power Station and the Boyne Island aluminium smelter unless replacement connection agreements are entered into in respect of the power station and smelter.

(b) Despite anything to the contrary in clause 5.2.2, if the generating system at Gladstone Power Station meets the technical connection requirements of the Interconnection and Power Pooling Agreement, or the technical requirements of a replacement connection agreement no less onerous than those in the Interconnection and Power Pooling Agreement, the relevant generating system is to be deemed to comply with all the technical connection requirements of the Rules in respect of the Gladstone Power Station.

(c) Despite anything to the contrary in clause 5.2.2, if the Boyne Island aluminium smelter meets the technical connection requirements of the Interconnection and Power Pooling Agreement, or the technical requirements of a replacement connection agreement no less onerous than those in the Interconnection and Power Pooling Agreement, the Boyne Island aluminium smelter is to be deemed to comply with all the technical connection requirements of the Rules in respect of the Boyne Island aluminium smelter.

(d) Despite anything to the contrary in clause 5.2.2, if Queensland Rail complies with the technical requirements in the connection agreements for Queensland Rail connections as at 18 January 1998, Queensland Rail is to be deemed to comply with all the technical connection requirements of the Rules.
(e) Small Generators are not required to comply with the conditions of connection set out in schedule 5.2 of the Rules.

9.37.3 [Deleted]

9.37.4 [Deleted]

9.37.5 **Forecasts for connection points to transmission network (clause 5.11.1)**

If a Network Service Provider, on the Queensland system, modifies forecast information in accordance with clause 5.11.1(d), then that Network Service Provider is not required to notify the relevant Registered Participant if it has conflicting confidentiality obligations to other Registered Participants.

9.37.6 **There is no clause 9.37.6**

9.37.7 **Cross Border Networks**

(a) If:

(1) the Minister considers that a transmission network or distribution network situated in Queensland is a continuation of a network situated in another participating jurisdiction and should be considered to be part of the network of that other participating jurisdiction; and

(2) the Minister for that other participating jurisdiction consents,

then those Ministers may nominate that the network is deemed to be entirely in that other participating jurisdiction and the Rules including any relevant jurisdictional derogations for the other participating jurisdiction are deemed to apply to the network as if the network were located entirely within that other participating jurisdiction.

(b) If a nomination is made under clause 9.37.7(a), then the jurisdictional derogations for Queensland do not apply to the continuation of the relevant network which is situated in Queensland.

(c) If the Minister of another participating jurisdiction nominates that the jurisdictional derogations for Queensland should apply to a network part of which is situated in that other participating jurisdiction, then if the Minister in respect of Queensland consents, the jurisdictional derogations for Queensland are also to apply to that part of the network situated in the other participating jurisdiction.

9.37.8 [Deleted]

9.37.9 **Credible contingency events (clause S5.1.2.1 of schedule 5.1)**

(a) The protection systems installed on any 110/132kV lines located in Queensland and existing at market commencement are deemed to comply with clause S5.1.2.1(d) of schedule 5.1 of the Rules except where such protection system has a material effect in degrading the stability and security of the Queensland system or the power system.
9.37.10 Reactive power capability (clause S5.2.5.1 of schedule 5.2)

Clause S5.2.5.1 of schedule 5.2 of the Rules is replaced for each of the generating units situated at the relevant power station listed in the following table by the following:

For the purpose of this clause S5.2.5.1:

- **rated active power output** means the 'Rated MW Generated' (as defined in the Generating System Design Data Sheet) for the relevant synchronous generating unit, and

- **nominal terminal voltage** means the 'Nominal Terminal Voltage' (as defined in the Generating System Design Data Sheet) for the relevant synchronous generating unit.

(a) Each of the generating units, while operating at any level of active power output, must be capable of:

1. supplying at its terminals an amount of reactive power of at least the amount that would be supplied if the generating unit operated at rated active power output, nominal terminal voltage and a lagging power factor of 0.9; and
2. absorbing at its terminals an amount of reactive power of at least the amount that would be absorbed if the generating unit operated at rated active power output, nominal terminal voltage and a leading power factor set out in respect of that generating unit in column 3 of the following table.

(b) In the event that any of the relevant power factors referred to in paragraph (a) above cannot be provided in respect of a generating unit, the relevant Generator must reach a commercial arrangement under its connection agreement with the relevant Network Service Provider, or with another Registered Participant, for the supply of the deficit in reactive power as measured at that generating unit's terminals.

9.37.11 [Deleted]

9.37.12 Voltage fluctuations (clause S5.1.5 of schedule 5.1)

For application in Queensland, clause S5.1.5 of schedule 5.1 of the Rules is replaced with the following:

"A Network Service Provider whose network is a Queensland transmission network or a Queensland distribution network must include conditions in connection agreements in relation to the permissible variation with time of the power generated or load taken by a Registered Participant to ensure that other Registered Participants are supplied with a power-frequency voltage which fluctuates to an
extent that is less than the limit defined by the "Threshold of Perceptibility" or the "Threshold of Irritability" as the case may be for the conditions specified in the paragraph below, in Figure 1 of Australian Standard AS2279, Part 4.

A Network Service Provider whose network is a Queensland transmission network or a Queensland distribution network must ensure that voltage fluctuations caused by the switching or operation of network plant does not exceed the following amounts referenced to Figure 1 of Australian Standard AS 2279, Part 4:

(1) Above 66kV:
   (A) the "Threshold of Perceptibility" when all network plant is in service; and
   (B) the "Threshold of Irritability" during any credible contingency event which is reasonably expected to be of short duration;

(2) 66kV and below: the "Threshold of Irritability" when all network plant is in service.

The requirements of paragraphs (1) and (2) above do not apply to events such as switching of network plant to or from an abnormal state or to network faults which occur infrequently (ie. less than one event per day).

Where the Rules (other than this Part E) refer to clause S5.1.5(a) or (b) of schedule 5.1 of the Rules then, in so far as that reference relates to a Network Service Provider whose network is a Queensland transmission network or a Queensland distribution network or to a network which is a Queensland transmission network or a Queensland distribution network, that reference must be construed as a reference to the immediately preceding paragraph.

A Network Service Provider whose network is a Queensland transmission network or a Queensland distribution network is responsible only for excursions in voltage fluctuations outside the range defined in the first two paragraphs of this clause S5.1.5 caused by network plant and the pursuit of all reasonable measures available under the Rules to remedy the situation in respect of Registered Participants whose plant does not perform to the standards defined by clause S5.2.5.2(c) of schedule 5.2 of the Rules for Generators, the standards set out in the first paragraph below for Customers and the standards set out in the second paragraph below for Market Network Service Providers.

Each Customer must ensure that variations in current at each of its connection points including those arising from the energisation, de-energisation or operation of any plant within or supplied from the Customer's substation are such that the contribution to the magnitude and rate of occurrence of the resulting voltage disturbance does not exceed the following limits:

(i) where only one Customer has a connection point associated with the point of supply, the limit is 80% of the threshold of perceptibility set out in Figure 1 of Australian Standard AS2279, Part 4; or

(ii) where two or more Distribution Network Service Providers or Customers causing voltage fluctuations have a connection point associated with a point of supply, the threshold of perceptibility limit is to be shared in a manner to be agreed between the Distribution Network Service Provider and the
Registered Participant in accordance with good electricity industry practice that recognises the number of Registered Participants in the vicinity that may produce voltage fluctuations.

Each Market Network Service Provider must ensure that variations in current at each of its connection points arising from the energisation, de-energisation or operation of any of its plant involved in the provision of market network services are such that the contribution to the magnitude and rate of occurrence of the resulting voltage disturbance does not exceed the following limits:

(i) where only one Market Network Service Provider has a connection point associated with the point of supply, the limit is 80% of the threshold of perceptibility set out in Figure 1 of Australian Standard AS2279, Part 4; or

(ii) where two or more Distribution Network Service Providers, Market Network Service Providers or Customers causing voltage fluctuations have a connection point associated with a point of supply, the threshold of perceptibility limit is to be shared in a manner to be agreed between the Distribution Network Service Provider and the Registered Participant in accordance with good electricity industry practice that recognises the number of Registered Participants in the vicinity that may produce voltage fluctuations.

For these purposes, references to Australian Standard AS2279 are references to that standard as it existed prior to it being superseded by AS/NZS 61000.3.7:2001."

9.37.20 [Deleted]

9.37.21 Excitation control system (clause S.5.2.5.13 of schedule 5.2)

(a) For each of the generating units listed in the following table:

(1) the application of clause S5.2.5.13(a) of schedule 5.2 of the Rules is modified by amending it to ensure that the short-time average generating unit stator voltage at highest rated power output level is not required to be more than 5% above nominal stator voltage; and

(2) the application of clause S5.2.5.13(b) of schedule 5.2 of the Rules is modified by deleting the words "all operating conditions" and replacing them with the words "all normal operating conditions and any credible contingency event".

(b) [Deleted]

(c) [Deleted]

(d) For Collinsville Power Station, any variation to the minimum performance requirements specified in clause S5.2.5.13 of schedule 5.2 of the Rules is to be limited to figures agreed with the Network Service Provider to whose network the Collinsville Power Station is connected.

(e) A Generator whose generating unit is situated in Queensland must ensure that each new synchronous generating unit of greater than 100MW is fitted with a static excitation system or some other excitation control system which will provide voltage regulation to within 0.5% of the selected setpoint value unless otherwise agreed with the relevant Network Service Provider.

Note
See clause 11.10.7.

9.37.22 [Deleted]

9.37.23 Annual forecast information for planning purposes (schedule 5.7)

Each Registered Participant that has a connection point to a Queensland transmission network must submit to the relevant Queensland Transmission Network Service Provider a forecast of the annual energy consumption associated with each connection point together with the information set out in schedule 5.7 of the Rules.
9.38 Transitional Arrangements for Chapter 6 - Network Pricing

9.38.1 [Deleted]

9.38.2 [Deleted]

9.38.3 [Deleted]

9.38.4 Interconnectors between regions

For the purposes of the Rules, the interconnector between Armidale in New South Wales and Tarong in Queensland, to the extent that it forms part of the Queensland system, is deemed to be a regulated interconnector.

9.38.5 Transmission pricing for exempted generation agreements

(a) Notwithstanding the provisions of Chapter 6, the amounts payable for transmission services in respect of a generating system or a load the subject of an exempted generation agreement by a Generator or Customer which is referred to in an exempted generation agreement, or the relevant State Electricity Entity nominated pursuant to clause 9.34.6(a), as the case may be, will be the amounts payable under the connection agreement in respect of that generating system or load.

(b) If the amounts payable for transmission services under clause 9.38.5(a) differ to those that would have been payable if the amounts had been calculated in accordance with the provisions of Chapter 6 (as modified by this clause 9.38) then the amount of that difference is to be recovered in accordance with clause 6.5.6(a).

(c) For the purpose of clause 9.38.5(b), the amount of any difference is to be recovered from Transmission Customers located in Queensland and connected to the Queensland system and is not otherwise to be taken into account in determining Transmission Customer common service charges under clause 6.5.6(a).

(d) For the application of clause 9.38.5(a) to the generating system at Gladstone Power Station and the load at the Boyne Island aluminium smelter, the connection agreement referred to is the Interconnection and Power Pooling Agreement dated 30 March 1994 between the owners of the Gladstone Power Station and the Queensland Electricity Commission (as amended prior to 18 January 1998), or any connection agreements entered into in respect of those connection points in replacement of that agreement, provided that in the latter case any difference to be recovered pursuant to clause 9.38.5(b) must not exceed that which would have applied had that agreement continued.

(e) Clause 9.38.5(a) continues to apply in respect of the generating system at Gladstone Power Station and the load at the Boyne Island aluminium smelter despite the entering into connection agreements in replacement of the Interconnection and Power Pooling Agreement as envisaged in clause 9.38.5(d).
9.39 Transiently Arrangements for Chapter 7 - Metering

9.39.1 Metering installations to which this clause applies

(a) The transiently metering provisions set out in schedule 9G1 apply to Queensland in respect of Chapter 7.

(b) Notwithstanding the application of schedule 9G1 in Queensland, the transiently arrangements set out in this clause 9.39 apply in relation to a metering installation (including a check metering installation) that meets the following criteria:

(1) at 1 October 1997, the metering installation:

(i) was a metering installation to which the Queensland Grid Code applied; and

(ii) complied with the metering requirements of the Queensland Grid Code; and

(2) excepting normal repair and maintenance, no part of the metering installation has been modified or replaced since 1 October 1997.

### Part F  Jurisdictional Derogations for Tasmania

#### 9.42  Definitions and interpretation

##### 9.42.1 Definitions

For the purposes of this Part F:
(a) a word or expression defined in the glossary in chapter 10 has the meaning
given to it in the glossary, unless it is referred to in column 1 of the following
table; and

(b) a word or expression referred to in column 1 of the following table has the
meaning given to it in column 2 of the table:

<table>
<thead>
<tr>

</tbody>
</table>

9.42.2 Interpretation
In this Part F, references to Tasmania do not include King Island or Flinders Island unless the context otherwise requires.

9.42.3 National grid, power system and related expressions
Notwithstanding anything else in the Rules, but subject to the other provisions of this Part F, on and from the Transition Date:

(a) the connected transmission systems and distribution systems located in
    Tasmania are to be treated as forming part of the national grid and the
    interconnected transmission and distribution networks; and
(b) the electricity power system located in Tasmania, including associated generation and transmission and distribution networks for the supply of electricity, is to be treated as forming part of the power system and the electricity system, even if they are not connected to a network or networks in other participating jurisdictions.

9.43 [Deleted]

9.44 Transitional arrangements for Chapter 2 – Registered Participants and Registration - Customers (clause 2.3.1(e))

For the purposes of clause 2.3.1(e), and for the purposes of clause 2.4.2(b) in so far as it relates to Customers, a person satisfies the requirements of Tasmania for classification of a connection point of that person if that person is a retailer or is a contestable customer within the meaning of the ESI Act in respect of that connection point.

9.45 Tasmanian Region (clause 3.5)

Notwithstanding Chapter 2A, the State of Tasmania is, and must be, one region and that region must not include any areas which fall outside of the State of Tasmania.

9.47 Transitional arrangements for Chapter 5- Network Connection

9.47.1 Existing Connection Agreements

The following agreements are each to be taken to be a connection agreement for the purposes of clause 5.2:

(a) the Connection Agreement dated 1 July 1998 between Aurora and Hydro Tasmania;

(b) the Connection and Network Services Agreement dated 1 July 1998 between Transend and Aurora;

(c) the Connection and Network Services Agreement dated 1 July 1998 between Transend and Hydro Tasmania;

(d) the Basslink Connection Agreement dated 28 January 2000 between National Grid International Limited and Transend; and

(e) any other connection agreement entered into prior to the Transition Date in accordance with the Tasmanian Code.

9.48 Transitional arrangements - Transmission and Distribution Pricing

9.48.4A Ring fencing

On the AER's assumption of responsibility for the economic regulation of distribution services in Tasmania, the following guidelines (as amended or substituted from time to time) will be taken to be distribution ring-fencing guidelines issued by the AER under Rule 6.17:
9.48.4B Uniformity of tariffs for small customers

(a) In making a distribution determination or approving a pricing proposal for a Tasmanian Distribution Network Service Provider, the AER must ensure that distribution tariffs for small customers of a particular class are uniform regardless of where in mainland Tasmania the customer is supplied with electricity.

(b) In this clause, small customer has the same meaning as under the National Energy Retail Law (Tasmania) Regulations 2012.

9.48.5 Transmission network

For the purpose of the Rules, a network operating at "extra high voltage" (as that term is defined in the ESI Act) is deemed to be a transmission network.

9.48.6 Deemed regulated interconnector

For the purposes of the Rules, any interconnector between regions in Tasmania in existence when those regions are established, to the extent that it forms part of the power system in Tasmania, is deemed to be a regulated interconnector.

Schedule 9G1 Metering Transitional Arrangements

1. Introduction

(a) The following minimum requirements apply in respect of metering installations commissioned before 13 December 1998.

(b) [Deleted]

2. [Deleted]

3. General Principle

The general principle is that meters are required and a metering installation(s) capable of recording half-hour energy flows and of providing electronic data for transfer to the metering database is to be in place for each Market Participant's connection point(s) before the Market Participant is permitted to participate in the market, and there will be no relaxation of this principle in the jurisdictional derogations.
5. **Accuracy Requirements**

5.1 **Existing Metering Installations Transitional Exemptions**

In addition to those allowances in clause S7.2.2 of schedule 7.2 - "Metering installations commissioned prior to 13 December 1998", the following conditions/exemptions apply:

(a) For Generators, generated quantities together with estimates for generating unit auxiliary loads may be used provided there is an agreed method with NEMMCO for determining sent-out energy. [refer to clause 7.3.2]

(b) The check metering requirements of the Rules do not have to be met for Type 1 metering installations. A minimum of partial check metering is required for Types 1 and 2 metering installations. [refer to clause S7.2.4 of schedule 7.2 of Chapter 7]

(c) Joint use of secondary circuits is permitted for Type 1 metering installations. [refer to cl.S7.2.6.1(a) of schedule 7.2 of Chapter 7]
