National Electricity Rules As in force in the Northern Territory
Version 58

Status Information

This is the latest electronically available version of the National Electricity Rules as in force in the Northern Territory (NT NER) as at 17 September 2020.

This consolidated version of the NT NER reflects the current version of the National Electricity Rules (version 150) as amended by the following regulations made by the Northern Territory under section 13(2)(c) of the National Electricity (Northern Territory) (National Uniform Legislation) Act:

    National Electricity (Northern Territory) (National Uniform Legislation) (Modification) Regulations.

Provisions in force

All provisions displayed in this consolidated version of the Rules have commenced.

As at the date of this consolidation:

(a) the Australian Energy Market Commission has made certain Rules under Part 7, Division 3 of the National Electricity Law that have not yet commenced. A complete list of these Rules is set out under "Provisions in Force" on the cover sheet of the latest version of the National Electricity Rules.

(b) As at the date of this consolidation, the Northern Territory has adopted (or adopted a modified version of) various provisions of the National Electricity Rules with effect from 1 July 2019 and certain other provisions with effect from the date that the Northern Territory adopts the National Energy Retail Law as a law of the Northern Territory. The provisions to be adopted and the modifications to those provisions (if relevant) are specified in the National Electricity (Northern Territory)(National Uniform Legislation)(Modification) Regulations.

This consolidated version of the NT NER contains drafting notes to indicate the provisions of the National Electricity Rules that have been adopted in the Northern Territory with effect from a later date.

11.100.4 Inertia requirements ....................................................................................942
11.100.5 NSCAS not to be used to meet an inertia shortfall after 1 July 2019..........943
11.100.6 Inertia network services may be used to meet an NSCAS gap
declared in the NSCAS transition period..............................................................943
11.100.7 Inertia network services made available before the commencement
date..........................................................................................................................944

Part ZZZC Managing power system fault levels .........................................................944
11.101 Rules consequential on the making of the National Electricity
Amendment (Managing power system fault levels) Rule 2017.................................944
11.101.1 Definitions ..................................................................................................944
11.101.2 System strength impact assessment guidelines...........................................946
11.101.3 System strength requirements methodology.............................................946
11.101.4 System strength requirements ...................................................................946
11.101.5 NSCAS not to be used to meet a fault level shortfall after 1 July
2019 .........................................................................................................................947
11.101.6 System strength services may be used to meet an NSCAS gap
declared in the NSCAS transition period..............................................................947
11.101.7 Withdrawal of a system strength-related NSCAS gap already
declared......................................................................................................................948
11.101.8 System strength services made available before the commencement date

Part ZZZD Generating System Model Guidelines

11.102 Making of Power System Model Guidelines

Part ZZZE Five Minute Settlement

11.103 Rules consequential on the making of the National Electricity Amendment (Five Minute Settlement) Rule 2017 and the National Electricity Amendment (Delayed implementation of five minute and global settlement) Rule 2020

11.103.1 Definitions

11.103.2 Amendments to procedures

11.103.3 Exemption for certain metering installations

11.103.4 New or replacement meters

11.103.5 Metering installations exempt from metering data provision requirements

11.103.6 Exemption from meter data storage requirements

11.103.7 Default offers and bids submitted prior to the commencement date

Part ZZZF Contestability of energy services

11.104 Rules consequential on the making of the National Electricity Amendment (Contestability of energy services) Rule 2017

11.104.1 Definitions

11.104.2 New guidelines

11.104.3 Transitional arrangements for application of Distribution Service Classification Guidelines and service classification provisions

11.104.4 Transitional arrangements for application of Asset Exemption Guidelines, exemption applications and asset exemption decisions

11.104.5 Transitional arrangements for adjustment in value of regulatory asset base

Part ZZZG Declaration of lack of reserve conditions

11.105 Making of lack of reserve declaration guidelines

11.105.1 Definitions

11.105.2 Making of lack of reserve declaration guidelines

Part ZZZH Implementation of demand management incentive scheme

11.106 Implementation of demand management incentive scheme

11.106.1 Definitions

11.106.2 Purpose

11.106.3 Early application of revised demand management incentive scheme

Part ZZZI Reinstatement of long notice Reliability and Emergency Reserve Trader

11.107 Rules consequential on the making of the National Electricity Amendment (Reinstatement of long notice Reliability and Emergency Reserve Trader) Rule 2018

11.107.1 Definitions

11.107.2 New RERT guidelines

11.107.3 Amendments to RERT procedures
11.107.4 Reserve contracts entered into before the commencement date ..........961

Part ZZZJ Register of distributed energy resources ........................................961

11.108 Rules consequential on the making of the National Electricity Amendment (Register of distributed energy resources) Rule 2018 .................................................................961

11.108.1 Definitions ..............................................................................................961

11.108.2 AEMO to develop and publish DER register information guidelines .....962

11.108.3 NSPs to provide AEMO with existing DER generation information ......962

Part ZZZK Generator technical performance standards .....................................962

11.109 Rules consequential on the making of the National Electricity Amendment (Generator technical performance standards) Rule 2018 .................................................................962

11.109.1 Definitions ..............................................................................................962

11.109.2 Application of the Amending Rule to existing connection enquiries ....963

11.109.3 Application of the Amending Rule to existing applications to connect ...............................................................................................................................964

11.109.4 Application of the Amending Rule to existing offers to connect .........966

11.109.5 Application of the Amending Rule to Existing Connection Agreements .................................................................................................................................966

Part ZZZL Generator three year notice of closure ..............................................967

11.110 Rules consequential on the making of the National Electricity Amendment (Generator three year notice of closure) Rule 2018 .................................................................967

11.110.1 Definitions ..............................................................................................967

11.110.2 AER to develop and publish notice of closure exemption guideline ......967

11.110.3 Application of Amending Rule to AEMO ..............................................967

11.110.4 Application of Amending Rule to Generators .......................................967

Part ZZZM Participant compensation following market suspension ..................968

11.111 Rules consequential on the making of the National Electricity Amendment (Participant compensation following market suspension) Rule 2018 .................................................................968

11.111.1 Definitions ..............................................................................................968

11.111.2 Market suspension compensation methodology and schedule of benchmark values ...............................................................................................................................968

Part ZZZN Global settlement and market reconciliation ....................................968

11.112 Rules consequential on the making of the National Electricity Amendment (Global settlement and market reconciliation) Rule 2018 and the National Electricity Amendment (Delayed implementation of five minute and global settlement) Rule 2020 ....968

11.112.1 Definitions ..............................................................................................968

11.112.2 Amendments to AEMO procedures ......................................................969

11.112.3 AEMO to publish report on unaccounted for energy trends ..................969

11.112.4 Continuation of registration for non-market generators .......................969

11.112.5 Publication of UFE data by AEMO .......................................................969

11.112.6 Publication of UFE reporting guidelines ..............................................970

Part ZZZO Metering installation timeframes ......................................................970
11.113 Rules consequential on making of the National Electricity Amendment (Metering installation timeframes) Rule 2018 ..........970
11.113.1 Definitions ..................................................................................................970
11.113.2 Timeframes for meters to be installed ...................................................970

Part ZZZP Early implementation of ISP priority projects ......................................971
11.114 National Electricity Amendment (Early implementation of ISP priority projects) Rule 2019 .....................................................................971
11.114.1 Definitions ..................................................................................................971
11.114.2 Modifications to clause 5.16.6 for ISP VNI and QNI projects.................972
11.114.3 Modifications to clause 6A.8.2 for ISP projects .........................................973

Part ZZZQ Enhancement to the Reliability and Emergency Reserve Trader........975
11.115 Rules consequential on the making of the National Electricity Amendment (Enhancement to the reliability and emergency reserve trader) Rule 2019 .....................................................................975
11.115.1 Definitions ..................................................................................................975
11.115.2 New RERT guidelines ..............................................................................976
11.115.3 Amendments to RERT procedures ..........................................................976
11.115.4 Reserve contracts entered into before the commencement date .................976
11.115.5 Clause 3.20.6 (Reporting on RERT by AEMO) .........................................976

Part ZZZR Retailer Reliability Obligation ................................................................976
11.116 Rules consequential on the making of the National Electricity Amendment (Retailer Reliability Obligation) Rule 2019 ........................................................................976
11.116.1 Application .................................................................................................976
11.116.2 Reliability Instrument Guidelines ..............................................................977
11.116.3 Forecasting Best Practice Guidelines .......................................................977
11.116.4 Reliability Forecast Guidelines .................................................................977
11.116.5 AER Opt-in Guidelines ............................................................................978
11.116.6 Contracts and Firmness Guidelines ............................................................978
11.116.7 Qualifying contracts under interim Contracts and Firmness Guidelines .................................................................978
11.116.8 Grandfathering arrangements ....................................................................978
11.116.9 Reliability Compliance Procedures and Guidelines ................................ 979
11.116.10 MLO Guidelines ....................................................................................980
11.116.11 Application of Part G, Divisions 2 – 6 (inclusive) ....................................980
11.116.12 Interim deeming of MLO generators and MLO groups .........................981
11.116.13 MLO information template ......................................................................987
11.116.14 Initial MLO register ...............................................................................988
11.116.15 Approved MLO products list ..................................................................988
11.116.16 Designated MLO exchange ..................................................................988
11.116.17 Five minute settlement intervals .............................................................988
11.116.18 Review by AEMC ...................................................................................988
