

Removal of Unaccounted for Energy from Liable Load in the RRO – ERC00333

The Energy Users' Association of Australia (EUAA) is the peak body representing Australian commercial and industrial energy users. Our membership covers a broad cross section of the Australian economy including significant retail, manufacturing, building materials and food processing industries. Combined our members employ over 1 million Australians, pay billions in energy bills every year and in many cases are exposed to the fluctuations and challenges of international trade.

This is a short submission to support the proposed rule change ERC0033

In short:

- Supports this rule change being subject to the expedited process, and
- Supports the rule change request

Do not hesitate to be in contact should you wish to discuss this further.

Andrew Richards
