

Submission Type: Rule Change

Reference: Accelerating smart meter deployment

Organisation: Nil

First Name: Judy

Last Name: O'Farrell

Email: [REDACTED]

Phone Number: [REDACTED]

Comments: Good afternoon,

For two years 2015-2016, I was totally sensitive to all screens e.g. mobile phones, TV, computer plus I could not go anywhere that had WiFi radiating out. Luckily I lived in a rural area. However, I was very limited as to where I could go. The radiation would burn my face, mucus membranes of my mouth and throat. Sleep was impaired enormously.

Fortunately I have found ways to minimise these effects. However, the very idea of a Smart meter being attached to our house is just not a liveable option for me. IT JUST IS NOT. I can not emphasise this enough.

Please do not make Smart meters obligatory.

Thank you for reading.

Kind Regards,

Judy O'Farrell
