Subject: Submission Received

The below submission has been lodged and confirmed on the AEMC Web site.

Submission Type: Market Review

Reference: Electricity pricing for a consumer-driven future

Organisation: Cotton Australia

First Name: Jennifer

Last Name: Brown

Email: [jenniferb@cotton.org.au](mailto:jenniferb@cotton.org.au)

Phone Number: 0404803184

Comments: A very brief submission after attending Tuesday's webinar.

Regarding the definition of "diverse" in "diverse set of consumers" that this definition include regional and remote energy consumers (businesses and individuals).

Similarly that AEMC ensures "Consumer groups and advocates" includes small and large businesses, set of consumer preference principles" to be interested include representatives of remote and regional business energy users.

Furthermore, AEMC consider 'vulnerable' to include rural and regional community energy consumers who are vulnerable to climate events affecting their income - horticulture and agribusiness, associated food, fibre and foliage producers as well as regional businesses reliant on tourism and providing accommodation and facilities.

I would be happy to provide further clarification and specific examples.
