

EPR0097 - The pricing Review: Electricity for a consumer-drive future

This is not for consumers - but to help electricity companies make more money. Those with solar and the poor will be worse off. Those rich with solar will go off grid. This is VERY unfair.

I strongly oppose the proposed increase to fixed electricity charges under EPR0097.

Increasing the fixed portion of bills will unfairly penalise households that use less electricity and those who have invested in rooftop solar and batteries. These households have reduced demand on the grid and made significant private investments to support Australia's clean energy transition. They should not be worse off because of it.

I am still paying off my loan to buy solar!!

I urge the AEMC to protect fair usage-based pricing and maintain strong incentives for households to reduce demand and invest in clean energy.
