

# Notice under National Electricity Rules

## *Notice of draft report extension*

The Australian Energy Market Commission (AEMC) gives notice, under clause 8.9.2(d) of the National Electricity Rules, that the time for publishing a draft report under clause 8.9.2(b) for the *Review of the Integrated System Plan framework* (Ref. EPR0092) has been extended to **17 December 2026**.

The reason for the extension is to enable the AEMC to address issues of sufficient complexity raised by stakeholders in response to the consultation paper.

The Commission proposes to publish a directions paper and consult with stakeholders on draft policy positions before it publishes the draft report.
