# Information provisions

- Necessary for system planning
  - NEMMCO, Participants, Intending Participants and NSPs
- Existed prior to AEMC changes during the wind technical standards changes
  - AEMC requested NEMMCO to put proposal back
  - NEMMCO balked
  - NGF volunteered
- Issue is confidentiality
- Proposal attempts to:
  - Ensure NEMMCO can provide useful information to participants
  - IP is protected
  - Process is manageable

# Known Issues

- Does not solve all of the problems
  - Other modelling software
  - But does not change their status just assists generators and NSPs
- Releasable User Guide
  - Needs to be expanded to allow NEMMCO to edit/extract/use more generally
  - Transitional provisions needed
- 3.13.3(1) – NEMMCO release
  - Needs to define when new data is included
  - After “offer to connect” has been made
- NGF and NEMMCO will submit on these issues
