Dear Dr Tamblyn,

Windlab Systems wish to support the requested amendment to Clause 3.13.3(14) as detailed by Senergy Econnect Australia in their request for a rule change.

As a wind farm developer, Windlab Systems investigates the potential for wind farm sites and one of the most important factors in this process, besides wind, is grid connection. The rule in its current form affects us directly because it restricts the availability of information relating to connection studies for our sites.

Please feel free to contact me if you have any questions.

Best Regards,

Jesse Copland
Project Development Engineer
