Proposed Rule Changes – Metrology Harmonisation

Dear Mr Tamblyn,

Thank you for the opportunity to respond to the proposed changes to Chapter 7 of the National Electricity Rules submitted by NEMMCO under its Metrology Harmonisation Programme.

Centurion Metering Technologies Pty Ltd (Centurion) is an accredited Metering Data Agent and specialises in the provision of Type 1-4 metering services to electricity Retailers.

Centurion fully supports the rule changes as proposed by NEMMCO.

In particular, we note the preservation of competition provisions relating to Type 1-4 metering installations, which allow the Retailer to be the Responsible Person and to choose their preferred Metering Provider. This is essential to the ongoing commercial viability of our business.

Thank you again for the opportunity to comment.

Yours sincerely,

Marco Bogaers
Managing Director
