Attention Dr. John Tamblyn - Chairman

Dear John

Submission on Rule Changes – Chapter 7

Metering Dynamics agrees with most of the changes proposed. However, there are a few amendments we would like to provide to reflect on the existing practices in the market as follows.

Clause 7.7 (b), "via the MDP" should be added to the end of the clause after *metering database*. This is because MDPs do not have sufficient security protection for anybody to get into their metering database.

Clause 7.11 (b), "which affects the correct registration of energy usage" should be add to after the word 'malfunction'. This is because the within 2 days is very hard and costly to achieve for all faults.

Thanks you for your attention.

Yours sincerely

Peter Chan
Manager Metering Dynamics
