**AEMC DSP STAGE 2 - SUPPLEMENTARY SUBMISSION**  
**PROVIDING AN ENVIRONMENT TO ENCOURAGE DEMAND SIDE**  
**PARTICIPATION (DSP) IN THE NATIONAL ELECTRICITY MARKET (NEM)**

Thank you for the opportunity to make a Supplementary Submission. Energy Response and a number of other parties believe that this is such an important Review that every endeavour must be made during this Review to identify all the barriers and recommend solutions that will encourage and empower the Demand Side of the National Electricity Market (NEM) to participate to the fullest extent possible.

A successful outcome of this Review will mean that electricity consumers will be able to realise the best value for themselves and help create a more efficient, reliable and sustainable electricity supply system for Australia and Australians.

Our appreciation is expressed in the Submission for the assistance and knowledge from a number of parties who assisted with the formation of this Submission.

We are happy to discuss any of the matters in this Submission at any time.

Yours faithfully

Ross S. Fraser  
Executive Chairman
