Dear Ian

**NEM Reliability Settings: VoLL, CPT and Future Reliability Review
Exposure draft for consultation**

Thankyou for providing the opportunity for comment on the above exposure draft Rules.
NEMMCO wishes to make one suggestion for improvement of the proposed Rule drafting as
set out below.

Clauses 3.9.3A(1) and 3.9.4(c) of the exposure draft make reference to the "reliability
standard". This term does not appear to be defined in the Rules, although we understand
the intention to be "the reliability standard set out in the *power system security and reliability
standards*". In the interests of ensuring that the Rules are clear and reflect the Panel's
intentions, it is suggested that the Reliability Standard be more clearly defined.

If you wish to discuss this suggestion further, please do not hesitate to call me on 02 9239
9103.

Yours sincerely

Brian Spalding
