**Electronic submission:** lodged online via [www.aemc.gov.au](http://www.aemc.gov.au)

Dear Sir/Madam

**Draft National Electricity Amendment (Access to NMI Standing Data) Rule 2013**

Momentum Energy welcomes the opportunity to provide comments in response to the Draft National Electricity Amendment (Access to NMI Standing Data) Rule 2013.

Momentum Energy is a second tier retailer with current retail electricity licences in Victoria, New South Wales, South Australia, Queensland and the Australian Capital Territory. Momentum Energy is fully owned by Hydro Tasmania, one of the largest clean energy producers in Australia.

Momentum has reviewed the AEMC's proposed changes and supports the general approach to the Access to NMI Standing Data Consultation Paper. As outlined by the Energy Retailers Association of Australia, Momentum agrees that the proposed clause 8.6.2(b1) (restated below) could be open to interpretations that are inconsistent with the intent outlined in the Draft Rule and would therefore support the following wording proposed by the ERAA.

(b1) (**service providers**): the use, disclosure and reproduction of information by a person who requires the information for the purposes of providing services in connection with the Registered Participant's supply or sale of electricity to end users.

If you would like to discuss this submission or any other matter, please contact Momentum's Regulatory Manager Luke Brown on (03) 8612 6437 or [luke.brown@momentum.com.au](mailto:luke.brown@momentum.com.au).

Yours sincerely

Alastair Phillips  
General Manager Regulatory and Compliance
