

Notices under National Electricity Law

The Australian Energy Market Commission (AEMC) gives notice under the National Electricity Law (NEL) of the following matters.

Under section 107, the period of time for preparing the draft determination for the proposed *National Electricity Amendment (Futures Offset Arrangements) Rule 2008* has been extended to **2 October 2008**.

Under section 95, the Australian Energy Regulator (AER) has requested the making of:

- the proposed *National Electricity Amendment (WACC – Alignment of Reviews) Rule 2008* which seeks to align the timing of the AER's review of the weighted average cost of capital parameters for transmission services with the equivalent review for distribution services; and
- the proposed *National Electricity (WACC Parameters – Technical Drafting Issues) Rule 2008* that seeks to amend certain clauses in the National Electricity Rules relating to the weighted average cost of capital reviews to be conducted by the AER.

The AEMC intends to expedite the making of both proposed Rules under section 96 on the grounds that the proposed Rules are non-controversial, subject to the receipt of written objections.

In relation to both proposals:

- written objections must be received by **29 May 2008**;
- submissions must be received by **13 June 2008**; and
- written objections and submissions may be forwarded to **submissions@aemc.gov.au** .

Further details on the above matters are available on the AEMC's website **www.aemc.gov.au**. All documents in relation to the above matters are published on the AEMC's website and are available for inspection at the offices of the AEMC.
