5 October 2007

Dr John Tamblyn
Australian Energy Market Commission
Level 5, 210 Elizabeth Street,
Sydney, NSW, 2000

Dear Dr Tamblyn,

AEMC CONGESTION MANAGEMENT REVIEW DRAFT REPORT

In response to the AEMC's invitation for submissions on the Congestion Management Review (CMR) draft report by 9 November 2007 the National Generators' Forum (NGF) considers that the timeframe for responses is insufficient to allow for a detailed consideration of the analysis and recommendations.

The NGF appreciates the past opportunities to provide its views on the issues associated with congestion management; however this is the first opportunity for stakeholders to provide feedback on analysis and recommendations.

Given the significant amount of detail in the report that needs to be understood and considered, and the time required to prepare thorough and meaningful responses to the recommendations, I propose the due date for submissions from stakeholders be extended to 7 December 2007. Due consideration of this request at your earliest convenience would be greatly appreciated.

Please do not hesitate contact me on (02) 6243 5120 if you wish to discuss any queries you may have in respect of this request.

Yours sincerely,

John Boshier
Executive Director
