Comments: I just read the story at <https://www.abc.net.au/news/2021-03-25/australians-with-rooftop-solar-charged-export-electricity-grid/100026336>

re: ERC0309

and I want to say "Why should I get punished for trying to be self-sufficient, after just spending \$13,000 on a battery and 13.5kwh solar system, for you to come along and charge me for exporting back to the grid ?"

You are punishing people like me who, are not wealthy, but have saved up to do the right thing and cut down our power bills. People like me who are on existing arrangements should be grandfathered and NOT punished for it.
