

The below submission has been lodged and confirmed on the AEMC Web site.

Submission Type: Rule Change

Reference: Access, pricing and incentive arrangements for distributed energy resources

Organisation: Individual

First Name: Michael

Last Name: King

Email: [emkay100@gmail.com](mailto:emkay100@gmail.com)

Phone Number: 0411747125

Comments: Charging homeowners with existing solar systems to export power to the grid is plain wrong. Other electricity generators are not charged on this way.

If, as is stated, increasing prices is a way to encourage homeowners to install battery systems, then surely a better way would be to offer incentives to install batteries rather than penalties. Home batteries make enormous sense.
